

Bucket Hat – Sizing/Fitting Chart - OLD SIZING

IMPORTANT – READ THIS INFORMATION BEFORE PURCHASING OR REQUESTING A CUSTOM ORDER FOR A BUCKET HAT

All brands of hats fit a little bit differently so it is important to measure your head and determine your hat size (note that the inside measurement of the hat should be a little larger than your head measurement). Please refer to the chart below for what the head size is meant to fit for a particular size and what the actual inside circumference measurement is.

How to measure your head for a hat:

Place a string or measurement tape around your head about 1/8" above your ears, across the mid-forehead, completely circling your head. Hold the tape firmly but not too tightly (if you have thick hair be sure the measuring tape is going over your hair). Basically, you need to measure your head exactly where the hat will sit. If your measurement falls between sizes, choose the next largest size (or you can order a custom made hat).

If you are still unsure what size to purchase, please feel free to contact me.

No returns will be accepted on hats if you choose the wrong size!

OTHER SIZES ARE AVAILABLE BY CUSTOM ORDER ONLY. Please contact me for availability and pricing.
