A CUSTOM ORDER FOR A FLEECE BEANIE

*****HAT FITTING INFORMATION*****

No returns will be accepted on hats if this information is not read/followed before purchasing

All brands of hats fit a little bit differently so it is very important to measure your head and determine your hat size - and how you want it to fit your head. The fleece beanies do have a small amount of stretch so that needs to be considered when ordering a size (in other words, if your head measures between 22 and 23", the small would fit).

If you have any questions, please contact me BEFORE purchasing a hat!!!

How to measure your head for a hat:

Place a string or measurement tape around your head about 1/8" above your ear, across the mid-forehead, completely circling your head. Hold the tape firmly, but not too tightly (if you have thick hair be sure the measuring tape is going over your hair). Basically you need to measure your head exactly where the hat will sit. If your measurement falls between sizes, choose the next largest size (or you can order a custom made hat to fit your head).

Inside hat measurements for the fleece beanie hats are as follows:

Extra Small - inside hat circumference measures 21"

Small - inside hat circumference measures 22"

Medium - inside hat circumference measures 23"

Large - inside hat circumference measures 24"

Extra Large - inside hat circumference measures 25"
